

# Case Study: 50% faster design cycle

## Design and Manufacturing integration - Leading Aerospace Supplier

**Business Challenges**

- Engineering & Manufacturing Data / Processes Out-Of-Sync
- Heterogeneous multiple design applications
- Unstructured Design Data Management

**Our Solution**

- Mateos suite based Integrated Design & Manufacturing for CATIA & UGNX across the organization
- Granular internal/external access and release control on design and manufacturing files
- Automatic Drawing generation and NC files interlocked with models

**Business Impact**

- 50%** Faster Design Release to Manufacturing
- 40%** Cost Reduction on new designs
- 70%** Design Data & Process Errors Reduced significantly
