

# Case Study: 1/3<sup>rd</sup> overhead reduction across departments

Automotive Giant

**Business Challenges**

- Surface Engineering, Modeling and Extended Engineering disconnected
- Manual design and surface variances
- Tedious & Costly Change Process

**Our Solution**

- Mateos™ Integration Platform based 3-way integration with Model validation and Engineering Control
- Surface Model and Model, EBOM and ASCII Protocol files and processes in-sync

**Business Impact**

- Centralized Design Systems
- 1/3<sup>rd</sup> Time reduction across departments
- 31% Cost Reduction on new designs
